- 🧠 Skills, Learning & AI
- 🏠 Debt, Saving & Assets
- 📞 Sales & Pricing
- 📱 Audience Building & Content
- 😓 Health, Focus & Productivity
- 🤝 Environment, Mindset & Social Circle
- 🚀 Action, Goals & Perspective

Income & Money Fundamentals 0:00

- **Stop trading time for money** — the foundational shift away from hourly/salaried thinking
- Prioritize active income before worrying about passive income
 - Get cash flowing first; passive income systems come after you have a base
- Do money-generating tasks before tasks that merely feel productive
 - Feeling busy ≠ making money; sequence your day around revenue-first activities
- Do NOT quit your job until your side business earns **at least 2× your current salary**
 - This protects you from desperation and premature decisions
- If you are living for Fridays, you need to start fixing Mondays
 - The problem is the work itself, not the schedule — change the work

Know Your Numbers & Business Metrics 0:00

- Know every key metric in your business:
 - **LTV** — Lifetime Value of a customer

- **CAC** — Cost of Acquisition per customer
- **ROAS** — Return on Ad Spend
- Ignorance of your numbers means you cannot optimize or scale
- Solve problems that people are **already paying others** to fix
 - Validated demand = existing market; no need to educate buyers on why they need it

Skills, Learning & AI 0:22

- Dedicate **90 minutes per day** to learning at least one high-income skill
 - Consistency over time compounds into marketable expertise
- Train AI to handle anything you have to do **more than 3 times per week**
 - Repetitive tasks are automation candidates; reclaim that time for higher-leverage work
- Pay for expert mentorship to shorten your learning curve
 - Starting to make money faster justifies the upfront cost
 - Don't take advice from broke people — source guidance from those who have achieved what you want

Debt, Saving & Assets 0:44

- It is only acceptable to borrow money for things that will **generate more money**
 - Debt for depreciating lifestyle items moves you backward
- **Buy assets before you start flexing** — accumulate before you display wealth
- Save and invest a **minimum of 20%** of your income
 - Non-negotiable floor; treat it as a bill you pay yourself first

Sales & Pricing 0:44

- Record your sales calls, then listen back and study them like game film
 - Identify objections, missed closes, and language that works
 - Iteration on real calls is the fastest way to improve conversion
- Ask for a raise or raise your prices — **people do not give money to those who don't ask**
 - The bottleneck is often simply not making the request
- Learn how to sell — rich people are not smarter than you, they are just better at asking for money

Audience Building & Content 0:65

- Post **3–5 times per day for 90 days straight**
 - Consistent volume over a sustained period is the mechanism for organic growth
 - "I bet you'll get some clients" — the outcome is near-certain with that volume

- Build your audience **before you need it**
 - Your followers are your future customers; grow the asset in advance of launching offers

Health, Focus & Productivity 0:22

- Put your phone in **another room** while working to eliminate distraction
- Check your screen time every Sunday, then **cut it in half** the following week
 - A weekly audit with a reduction target creates continuous improvement
- Sleep **7 hours every night**
 - You cannot make good decisions when you are tired — cognitive quality directly affects earning quality

Environment, Mindset & Social Circle 0:44

- Once a month, sit in a room with someone who earns **10× what you earn**
 - Proximity to higher earners resets your baseline for what is possible
- If your friends mock your dreams, **cut them off** — you do not need them
 - Negative social pressure is a real constraint on ambition; remove it
- Stop worrying about what others think — most people don't care about you as much as you think

Action, Goals & Perspective 0:65

- If you wait until you feel ready, you will **never start**
 - Readiness is a feeling that follows action, not a prerequisite for it
- Do not announce your goals publicly
 - It looks more impressive if you achieve them and no one knew you were working on them
 - Bonus: if you fail or change direction, no one knows
- Stop comparing your **Chapter 3** to someone else's **Chapter 30**
 - You are seeing their highlight reel at a different stage of the journey — it is not a fair comparison

The single biggest insight: rich people are not smarter than you — they are simply better at asking for money. Sales and asking are learnable skills, not innate traits.
