## Executive Summary

---

The real ceiling on business growth is the leader running it. Scaling from 7 to 8 figures requires personal development in communication, emotional control, and feedback — skills that cannot be outsourced.

-  The Skills That Drive Scale

## The Leadership Ceiling 0:00

---

- The growth of any business is ultimately capped by the growth of its leader
  - Most people blame the market, the product, or the team when growth stalls
  - The real bottleneck is almost always the person running the company
- "The company can only grow as fast as the CEO grows."
- Business is framed as a **self-development game** as much as a business game

## The Skills That Drive Scale 0:21

---

- Three specific leadership skills are identified as the bridge from 7-figure to **8-figure** revenue:
  - Communication skills
  - Emotional control
  - Ability to give feedback that helps people improve and grow
- These skills cannot be outsourced — the leader must personally do the work to develop them
  - The takeaway is direct: "You just have to put in the work to learn."
