If You Want It, You Have To Do This

Channel: Brandon Carter · Published: Nov 11, 2026 · Watch: https://www.youtube.com/shorts/euUMgIWRqXQ Source: full transcript

📋 Executive Summary

Six blunt cause-and-effect principles: every desired outcome has a direct, non-negotiable action required to achieve it — no shortcuts, no excuses.

📑 Contents

- 💰 Principle 1: Get Paid → Become Irreplaceable
- 🔄 Principle 2: Be Consistent → Stop Accepting Inconsistency
- 📈 Principle 3: Multiply Money → Start Investing
- 🎲 Principle 4: Achieve Success → Take Risk
- 🧠 Principle 5: Build Discipline → Control Your Impulses
- 🚫 Principle 6: Get Results → Stop Making Excuses

💰 Principle 1: Get Paid → Become Irreplaceable 0:00

- If you want to get paid, you have to become irreplaceable
  - The implication is that financial reward follows value that cannot be easily substituted
  - Being replaceable keeps you at commodity-level compensation

🔄 Principle 2: Be Consistent → Stop Accepting Inconsistency 0:00

- If you want to be more consistent, you have to stop accepting inconsistency
  - Consistency is not a trait you wait to develop — it is a standard you enforce on yourself immediately
  - Tolerating slip-ups normalizes them and breaks the pattern

📈 Principle 3: Multiply Money → Start Investing 0:00

- If you want to multiply your money, you have to start investing
  - Passive holding of money does not grow wealth — active deployment into investments is required

🎲 Principle 4: Achieve Success → Take Risk 0:00

- If you want success, you have to take risk
  - Success and safety do not coexist — meaningful outcomes require accepting exposure to failure or loss

🧠 Principle 5: Build Discipline → Control Your Impulses 0:00

- If you want discipline, you have to control your impulses
  - Discipline is not an abstract quality; it is the practical, moment-to-moment act of overriding short-term urges

🚫 Principle 6: Get Results → Stop Making Excuses 0:00

- If you want results, you have to stop making excuses

> The throughline of the entire video: every desired outcome has a direct required action — and the most common barrier is the behavior directly opposite to that action.
