I Built My Own AI Video Editor (5 Steps)

Channel: Brandon Carter · Published: Oct 30, 2026 · Watch: https://www.youtube.com/shorts/DIo8XGjxfe0 Source: full transcript

📋 Executive Summary

Brandon Carter shares a free, 5-step workflow using Claude and ChatGPT desktop apps to automate video editing — the system that let him publish over 1,000 pieces of content in just 30 days.

📑 Contents

- 🚀 Introduction & What's Possible
- 📁 Step 1: Set Up Your Folder Structure
- 💻 Step 2: Download the Desktop Apps & GitHub Repos
- 🎓 Step 3: Teach the AI Your Editing Style
- 🎬 Step 4: Feed in Your Raw Footage
- 💾 Step 5: Refine and Save as a Reusable Skill

🚀 Introduction & What's Possible 0:00

- Brandon posted **more than 1,000 pieces of content in 30 days**
  - He states this would have been impossible without Claude and ChatGPT
- The system is free to implement
- Works for both short-form and long-form videos

📁 Step 1: Set Up Your Folder Structure 0:05

- Create a new folder on your computer
- Inside that folder, create three separate sub-folders:
  - Folder 1 — all your **B-roll and photos**
  - Folder 2 — all your **music**
  - Folder 3 — your **raw footage** (unedited source video)

💻 Step 2: Download the Desktop Apps & GitHub Repos 0:22

- Download either the **Claude desktop app** or the **ChatGPT desktop app**
  - Explicitly noted: this does **not** work on mobile/phone — desktop only
- Install **three free GitHub repositories** (specific repo names not mentioned in transcript)

🎓 Step 3: Teach the AI Your Editing Style 0:30

- Provide the AI with multiple examples of Reels that match your preferred editing style
  - These should be edits you personally love and want to replicate
- Brandon explicitly gives permission to use his own Reels as style examples: > "আমার কাছ থেকে চুরি করার অনুমতি আপনাকে দেওয়া হলো।" (
