🎬 The Setup: Girlfriend Working on Videos 0:00

- A woman is working on her videos when her partner interrupts
- He offers to show her how AI tools can handle the editing for her
  - Promises her reels can be made to "spin around her" (dynamic rotation effect)
  - Mentions the ability to add a tier list overlay
  - Mentions adding charts to the videos
  - Describes the whole process as "very easy"
- She responds that she doesn't know how to do any of it

🤖 The AI Video Workflow Explained 0:07

- He lays out a step-by-step process she only needs to follow once:
  - Step 1 — Download the desktop app for **ChatGPT or Claude**
  - Step 2 — Install **three free GitHub repositories** (names not specified in transcript)
  - Step 3 — Get an **API key from ElevenLabs** (an AI voice/audio platform)
  - Step 4 — Show ChatGPT or Claude some example videos you like as reference
  - Step 5 — Feed in your raw footage and let the AI handle the rest
- Tools mentioned:
  - ChatGPT (OpenAI)
  - Claude (Anthropic)
  - ElevenLabs (for API key — likely for AI-generated voiceover or audio)

    - GitHub (three unspecified free repos)

📈 Results Claimed 0:23

- The man claims to have posted **more than 1,000 pieces of content** in the current month alone
    - Includes both YouTube Shorts and long-form YouTube videos
- States he has reached **1 million subscribers on YouTube**
- Implies the AI-assisted workflow is what enabled this volume of output
