📋 Executive Summary

ZssBecker announces that Hyros will soon let users prompt and vibe-code custom features directly into their live app, framing this "Custom SaaS" model as the future of software, while clarifying users own their data and can run their dashboard externally.

Oct 31, 2026 · 6:28 AM

Csas (Custom software as a Service) is the future of SaaS.

Starting next week, at @hyros_official . You'll be able to prompt any feature you want and vibe code it into your live app in minutes.

Not some vibe coded Frankestein app of your own. The actual HYROS dash. With no set

Oct 31, 2026 · 6:45 AM

@mdp_sec @hyros_official And FYI : We don't stop you from doing this. You can take your entire HYROS dash outside the app if you want and run it on your own everything, network still intact.

Your paying us for the infrastructure and cutting edge network that powers your app. Not our UI.
