-  Step-by-Step Content Idea Workflow

Step-by-Step Content Idea Workflow 0:00

- The core problem solved: never running out of content ideas
 - The method is described as "sneaky" — it reverse-engineers what's already proven to work
- The 5-step process:
 - Step 1 — Install the **Grabbit** Chrome extension
 - Step 2 — Open Chrome and navigate to a YouTuber's channel in your niche
 - Step 3 — Use Grabbit to scrape/grab all the URLs from that creator's most popular videos
 - Step 4 — Paste those URLs into **NotebookLM** (Google's AI research tool)
 - Step 5 — Ask NotebookLM to generate 20 topic ideas for Instagram Reels based on the content of those videos
- Why this works:
 - The ideas produced are grounded in videos that have already demonstrated strong performance
 - You're not guessing at topics — you're drawing from data on what audiences in your niche already watch and engage with
- Tools mentioned:
 - **Grabbit** — Chrome extension for bulk URL extraction from YouTube channels
 - **NotebookLM** — Google's AI tool that can analyze source material and generate content ideas from it
