

The best fat loss rules for guys over 30!

Channel: Brandon Carter · Published: Aug 13, 2026 · Watch: https://www.youtube.com/shorts/15kO1XI_4y4 Source: full transcript

Executive Summary

Ten practical fat loss rules for men over 30, spanning daily movement, nutrition tracking, protein targets, liquid calories, full-body training, and sleep optimization.

Contents

-  Rule 1: Walk 20,000 Steps a Day
-  Rule 2: Track Your Calories and Macros
-  Rule 3: Eat 1 Gram of Protein Per Pound of Bodyweight
-  Rule 4: Stop Drinking Your Calories
-  Rule 5: Train Full Body Workouts Four Times a Week
-  Rule 6: Sleep At Least 7 Hours a Night

Rule 1: Walk 20,000 Steps a Day 0:00

- Target is **20,000 steps** per day
 - This is a non-exercise activity thermogenesis (NEAT) strategy to increase daily calorie burn without formal training sessions

Rule 2: Track Your Calories and Macros 0:00

- Explicitly track both calories and macronutrients
 - Awareness of intake is presented as a foundational requirement for fat loss

Rule 3: Eat 1 Gram of Protein Per Pound of Bodyweight 0:00

- Protein target is **1 gram per pound of bodyweight**
 - Supports muscle retention during a caloric deficit, critical for men over 30 who face accelerated muscle loss

Rule 4: Stop Drinking Your Calories 0:00

- Eliminate liquid calories from the diet
 - Beverages like sodas, juices, and alcohol add calories without promoting satiety

Rule 5: Train Full Body Workouts Four Times a Week 0:00

- Recommended training frequency is **4 full-body sessions per week**
 - Full-body programming maximizes calorie burn and muscle stimulus per session compared to split routines

Rule 6: Sleep At Least 7 Hours a Night 0:00

- Minimum sleep target is **7 hours** per night
 - Adequate sleep supports hormonal balance, recovery, and appetite regulation — all of which affect fat loss

Note: The transcript appears to be cut off mid-sentence. Only 6 of the promised 10 rules were captured in the available source material. The remaining rules are not summarized here, as they were not present in the transcript provided.
