

The ultimate tool stack for online trainers!

Channel: Brandon Carter · Published: Aug 13, 2026 · Watch: <https://www.youtube.com/shorts/qdkHrorhPI0> Source: full transcript

Executive Summary

Brandon Carter breaks down a 10/10 tool stack for online trainers using just six essentials, with GoHighLevel handling most functions — DMs, landing pages, CRM, and calendar bookings — in one platform.

Contents

-  Content Creation: iPhone & Wireless Mic
-  Automated DMs
-  Landing Page
-  CRM for Leads
-  Calendar & Booking
-  GoHighLevel Free Trial Offer

Content Creation: iPhone & Wireless Mic 0:00

- Use an **iPhone** for shooting all content — no fancy camera needed
 - Brandon owns expensive cameras but still films everything on his iPhone
- Pair it with a **wireless mic** for clean audio
 - He uses small "Holand" (likely Hollyland) clip-on mics visible in the video

Automated DMs 0:08

- Use a tool that sends **automatic DMs** to people who comment on your posts
 - Tool used: **GoHighLevel**
 - Turns post engagement into a direct-message funnel automatically

Landing Page 0:12

- A website is not required, but a **landing page is essential**
 - Purpose: capture contact information from leads
 - Use cases: free guide downloads, coaching inquiries
 - Can be fully built inside **GoHighLevel** — no separate tool needed

CRM for Leads 0=18s

- Need a **CRM** capable of sending texts, emails, and DMs to all leads
 - Tool used: **GoHighLevel** (again, all-in-one)
 - Centralizes all lead communication in one place

Calendar & Booking 0:22

- Leads should be able to **book themselves** on your calendar for:
 - Sales calls
 - Check-ins
- This functionality is **built directly into GoHighLevel** — no third-party scheduler needed

GoHighLevel Free Trial Offer 0:28

- Brandon has used GoHighLevel for **over 8 years** across all his businesses
- **Free 30-day trial offer:** comment "GHL" on the post and he will send the link via DM

The entire stack essentially collapses into two tools: an iPhone with a wireless mic for content, and GoHighLevel for everything else — DMs, landing pages, CRM, and booking.
