

# The ultimate tool stack for online trainers!

Channel: Brandon Carter · Published: Aug 14, 2026 · Watch: <https://www.youtube.com/shorts/1HzS3Hhg2oo> Source: full transcript

## Executive Summary

---

Brandon Carter breaks down a no-fluff, 5-piece tool stack every online trainer needs — from content creation to lead capture to booking sales calls — with GoHighLevel handling most of it.

## Contents

---

-  Content Creation Tools
-  Audio Gear
-  Automated DMs
-  Landing Page & Lead Capture
-  CRM, Outreach & Booking

## Content Creation Tools 0:00

---

- An iPhone is all you need to shoot content
  - Brandon owns expensive cameras but still films everything on his iPhone
  - No fancy camera required — removes a common barrier for new trainers

## Audio Gear 0:00

---

- A wireless mic to ensure good audio quality
  - Brandon specifically uses **Holand mics** (small/tiny form factor, visible on camera)
  - Audio quality is called out as a non-negotiable priority

## Automated DMs 0:00

---

- A tool that automatically sends DMs to people who comment on your posts
  - Brandon uses **GoHighLevel** for this functionality
  - Turns passive post engagement into active lead conversations without manual effort

## Landing Page & Lead Capture 0:00

---

- A landing page to collect contact information from potential leads
  - A full website is NOT necessary — just a landing page

- Two primary use cases for the landing page:
  - Free guide downloads
  - Coaching inquiry forms
- GoHighLevel can be used to set this up as well

## CRM, Outreach & Booking 0:22

---

- A CRM to communicate with all leads across multiple channels
  - Must support texts, emails, and DMs from one place
  - Brandon uses **GoHighLevel** for this too
- A built-in calendar/booking system so leads can self-schedule
  - Used for sales calls and client check-ins
  - Also built into GoHighLevel — no separate tool needed

GoHighLevel is the single platform Brandon relies on for automated DMs, landing pages, CRM outreach, and calendar booking — making it the cornerstone of this entire stack.
