

Best Countries for Dating Apps (TIER LIST)

Channel: Deni Ops · Published: Aug 13, 2026 · Watch: <https://www.youtube.com/watch?v=eyJooeurHLo> Source: full transcript

Executive Summary

Dating consultant "Danny Ops" ranks ~20 countries for dating app success using client case studies from running 1,000+ Tinder/Hinge accounts globally, covering match quality, conservatism, gold-digger risk, and ease of converting matches to dates.

Contents

-  Host Background & Format
-  America — A Tier
-  Spain — S Tier
-  Poland — A Tier
-  Sweden — A Tier
-  Switzerland — B Tier
-  Netherlands — B Tier
-  Germany — B Tier
-  France — C Tier
-  UK — B Tier
-  Hungary — B Tier
-  Austria — B Tier
-  Canada — B Tier
-  Australia — S Tier
-  Japan — C Tier
-  Mexico — C Tier
-  Romania — C Tier
-  Russia — C Tier
-  Italy — B Tier
-  Thailand — C Tier
-  India — D Tier
-  Dubai — D Tier
-  Saudi Arabia — I Tier
-  Greece — C Tier
-  Final Tier List Summary

Host Background & Format [0:00](#)

- Claims to have run over **1,000 Tinder accounts** across the world
- Uses a tier list format ranging from **S (best) to I (worst)**
- Evidence is drawn from client case studies — screenshots of match counts, chat logs, and testimonials shown on screen throughout
- Apps primarily discussed: **Tinder**, **Hinge**, **Instagram** (increasingly used as a dating tool)

America — A Tier [1:32](#)

- Placed in **A tier** — highly dependent on which state you're in
- Best cities/regions mentioned:
 - **Miami** — described as easy, high volume of attractive women
 - **Orange County** — model-tier women but high maintenance
 - **ASU (Arizona State University) area** — easy dating
 - **Boston** — described as very easy; client reportedly arranged a threesome within 2–3 days
 - **New York** — fast-paced dating culture; **Hinge is the dominant app** there
- Worst scenario: rural/midwestern states where population density is too low
- Not S tier because the state-by-state variance makes it a "hit or miss"
- Could warrant its own dedicated video covering every state

Spain — S Tier [2:41](#)

- **Top-ranked country overall** — placed in S tier
- Client case study: "Julian" — results described as "most ridiculous known to man"; team started rating girls 1–10 just to keep track
- Works across both **dating apps and nightlife**
- Client "Leon" (age 40, described as unattractive) received **99+ likes within a couple of hours** of account creation
- Key selling point: even unattractive or older men can get strong results
- Covers multiple regions including Mallorca, Tenerife, and mainland Spain
- Variety of women available — both long-term wifey material and casual encounters

Poland — A Tier [4:12](#)

- Placed in **A tier** (not S, despite strong match numbers)
- Client "Vic" received **99+ likes within 2 hours**; averaged **3 dates per day**
- Client "Alex" (American) traveled specifically to Poland for dating — illustrates destination-dating appeal
- Client "Peter" (younger) also achieved 99+ likes
- Downsides keeping it out of S tier:

- **Gold digger risk** — Western men are expected to spend money
- Girls are relatively **conservative** — one-night stands are harder to arrange
- Can be "boring to text" for English-speaking men due to language/cultural gap
- Polish women noted as generally attractive

Sweden — A Tier 6:03

- Placed in **A tier** — described as a "hidden gem"
- Stereotypical appeal: blonde hair, blue eyes
- Active client in Stockholm at time of filming had **over 1,000 likes** (age 28)
- "Thousands of likes is very attainable"
- Best city: **Stockholm**
- Downside: women described as "cold-hearted" and less outgoing than host prefers
- Good for easy sex but personality/warmth is lacking compared to other countries

Switzerland — B Tier 7:09

- Women are physically attractive (blue eyes, blonde) but **extremely high maintenance**
- Described as expecting luxury gifts (Birkin bags, Wolf of Wall Street lifestyle)
- Verdict: avoid unless you have significant disposable income
- Host had "a few accounts" there but generally advises against it
- Placed in **B tier** in final ranking

Netherlands — B Tier 7:54

- Best results in **Amsterdam**
- Client chat logs shown as evidence of strong initial results
- Negatives:
 - Girls "go for a bit then fall off" — engagement fades
 - More **conservative** — sexual texting is harder
 - More **girlfriend-oriented** than hookup-oriented country
- Client "J" got a girlfriend through the app — used as example of relationship potential
- Some unattractive women in the pool
- Placed in **B tier**

Germany — B Tier 8:43

- Team member "Max" (Irish-German) personally slept with **6 women in one week** using Hinge in Germany
- Host acknowledges Max is "Chad" and not a typical baseline
- Main downside: **conservative women** — harder to convert matches to casual sex

- Good for **relationships** rather than one-night stands
- One client shown using AI/Photoshop profile pictures with success
- Placed in **B tier**

France — C Tier [10:10](#)

- Placed in **C tier** — dating apps described as "okay" but not great
- Girls too conservative for easy short-term dating via apps
- Client in Paris reported that **dating apps don't work well** in France
- Recommended alternatives for France:
 - **Night game** (going out) — works well in Paris
 - **Instagram DMs** — host's team ran the client's Instagram account and got better results than apps
- Quote from client: "dating apps doesn't really work here"

"Instagram is the king of modern dating — it's taking over the dating apps."

UK — B Tier [11:20](#)

- Host is originally from Afghanistan but based in UK — uses himself and Max as case studies
- Women described as physically average but having the **best personalities** of any country
 - "UK girls have the most personality out of any other girls in the world"
 - Know how to drink, have fun on dates, handle themselves well
- Easier to date 5s–7s; getting 8s–10s requires significantly more effort
- Some women described as high-maintenance (asking for proof of car/wealth)
- Placed in **B tier** — not A because of the effort-to-reward ratio for attractive women
- Recommendation: go to Spain or America if you want model-tier women

Hungary — B Tier [12:50](#)

- High quality of women — "a lot of higher-level girls"
- Client testimonial: went from 30–40 likes in 2 months to **100+ likes in less than 1 day** after profile optimization
- Main problem: **low population volume** — not enough users on dating apps
- Placed in **B tier** due to volume limitation despite quality

Austria — B Tier [13:35](#)

- Similar profile to Switzerland: hot, high-maintenance women
- Client visiting from Switzerland found the experience "exactly the same" as Switzerland

- Women responsive and somewhat sexual in chat but **reluctant to meet in person**
- Described as "just all right" — solid but not a destination worth going out of your way for
- Placed in **B tier**

Canada — B Tier [14:43](#)

- Client "A" shown getting matches and dates via apps
- Core problem: **very liberal culture** — described as making app algorithms harder to game
- Described bluntly as "a shitty America" — similar vibe but lower quality across the board
- Placed in **B tier** — worse than the US but not bottom-tier

Australia — S Tier [15:27](#)

- Initially placed in A tier, then **bumped to S tier** at end of video
- Client had **109 Tinder likes** and ~50 Hinge likes; described as "barely able to keep up"
- Women described as attractive, fun, and sexually open
- Advantages over comparable countries:
 - Better than America — women have personality and aren't "brain dead"
 - Better than Sweden — women more open/approachable
 - Better than Poland — women speak English fluently
- Not a country for finding a long-term partner; best for casual dating
- Host's verdict: one of the best countries overall for hookup-oriented dating

Japan — C Tier [16:11](#)

- Placed in **C tier**
- Women very conservative
- Strong **racial preference** among Japanese women — prefer white men or same-race partners
- Non-white, non-Japanese men will likely struggle significantly
- Results vary heavily by ethnicity of the user

Mexico — C Tier [16:34](#)

- Placed in **C tier**
- Good destination specifically if you want **Latinas**
- Client "Andres" shown with strong results
- Women described as undemanding — "happy with just about anything"; no need to flash money
- Worse overall than North America in terms of general quality
- Safety caveat jokingly mentioned

Romania — C Tier [17:42](#)

- Placed in **C tier**
- Heavy **gold digger culture** — money is the primary determinant of success
- Unattractive men with money reportedly do very well
- Not recommended for men without significant disposable income
- Described as "a bit of a rubbish country" for broke daters

Russia — C Tier [18:05](#)

- Placed in **C tier** — similar profile to Romania
- **Gold digger central** — same warning applies
- Contextual note: many men away due to the war in Ukraine (framed as an "opportunity")
- Not recommended without money to spend

Italy — B Tier [18:26](#)

- Placed in **B tier** — top of the B tier in final ranking
- Women described as quite attractive
- Potential to meet long-term/wife-material women
- Women are conservative via text — avoid overly sexual messaging
- However, on the actual date they are described as easy to sleep with
- Good balance of looks and relationship potential

Thailand — C Tier [18:48](#)

- Placed in **C tier**
- Main issue: local women described as **green card/gold digger motivated**
- Most foreigners end up dating other tourists rather than local Thai women
- Client shown with thousands of likes — but caveat is those are likely tourists
- Local Thai women not considered particularly attractive by host
- Tourists are the primary draw, not the local dating pool

India — D Tier [19:31](#)

- Placed in **D tier**
- Described as "boring to text" with very difficult women
- Client "Prev" (5'2" Indian man) got a few dates — results described as "not very great"
- Host visited personally, made a Hinge account — women "worshipped" him (6'3", Western) but still very conservative and not attractive to him
- Verdict: women are difficult and results are poor regardless of effort

Dubai — D Tier 19:55

- Placed in **D tier**
- Women there primarily looking to be **paid for sex** — transactional dating culture
- Not a genuine dating market
- Only go if you want to pay; otherwise avoid

Saudi Arabia — I Tier 20:18

- Placed in **I tier** (the worst possible)
- **Dating apps are prohibited** — completely unusable
- No further discussion needed

Greece — C Tier 20:21

- Placed in **C tier**
- Women described as attractive and good **wifey material**
- Women described as domestically inclined ("will cook for you")
- Low volume of local women on apps — most good matches are tourists on holiday
- Recommended specifically for men seeking a **long-term partner**

Final Tier List Summary 21:01

- Final rankings reorganized at end of video:

Tier	Countries (in order within tier)
S	Spain, Australia
A	Sweden, Poland, America
B	Italy, UK, Netherlands, Germany, Hungary, Austria, Switzerland, Canada
C	France, Greece, Mexico, Thailand, Russia, Romania, Japan
D	India, Dubai
I	Saudi Arabia

- **Spain** rated #1 overall — versatile (casual and wifey material), easy for all attractiveness levels
- **Australia** bumped to S tier late — English-speaking, open women, strong results
- **America** stays A not S due to state-by-state inconsistency
- **Poland and Sweden** in A but held back by conservatism and language barriers respectively
- **B tier countries** are all viable but require more effort or have limiting factors (conservatism, gold diggers, low volume)

- **C tier** — niche use cases (France for night game, Mexico for Latinas, Greece for relationships)
- Host's closing note: results are possible in ALL listed countries — tier placement is about relative ease, not impossibility
