I Edit My Videos By Talking

Channel: Brandon Carter · Published: Oct 17, 2026 · Watch: https://www.youtube.com/shorts/Cp0TQySnn68 Source: full transcript

📋 Executive Summary

Brandon Carter has replaced traditional video editing with AI-driven voice/text instructions via Claude and ChatGPT, allowing him to publish at massive scale — 163 pieces of content in a single month.

- 🎬 The AI Editing Workflow
- 📈 The Results: Posting Volume

🎬 The AI Editing Workflow 0:00

- Brandon states he no longer manually edits his videos
- Instead, he simply talks through editing instructions to the AI
  - Example commands he gives:
    - "Show my biggest reel"
    - "Put some of my clients' transformations behind me"
    - "Make some of my top performing reels spin around me"
    - "Make a checklist right here"
    - "Throw some headlines behind me"
    - "Make this look like a movie trailer"
    - "Zoom in too much"
    - "Zoom out"
- The AI tools he uses for editing are **Claude** and **ChatGPT**
  - He describes using one or the other for "almost all" of his videos

📈 The Results: Posting Volume 0:22

- In the last 30 days, this workflow enabled him to post:
  - **92 Reels**
  - **71 YouTube Shorts**
- Combined total: 163 short-form videos in a single month
  - This scale would be extremely difficult to achieve with traditional manual editing
