How I Track My Eggs and Bacon

Channel: Brandon Carter · Published: Oct 17, 2026 · Watch: https://www.youtube.com/shorts/yT6jwiUfLpc Source: full transcript

📋 Executive Summary

Brandon Carter chooses whole eggs and bacon strips over scrambled eggs because individual units are easy to count and log accurately in a fitness tracker without needing to weigh anything.

📑 Contents

- 🍳 Why He Skips Scrambled Eggs
- 📊 The Exact Numbers He Tracks

🍳 Why He Skips Scrambled Eggs 0:00

- Asked why he doesn't get scrambled eggs, Brandon explains it comes down to trackability
  - Scrambled eggs would require a food scale to measure accurately
  - Whole eggs can simply be counted — no scale needed
  - This makes logging faster and more consistent

📊 The Exact Numbers He Tracks 0:00

- He counts his eggs visually and logs them directly into his fitness app ("fitness pile")
  - **6 eggs** — 429 calories, 37 g of protein
  - 5 pieces of bacon — 200 calories, 12.5 g of protein
- The core principle: unit-based foods eliminate guesswork and make tracking sustainable
