

Can you still get shredded without intermittent fasting?

Channel: Brandon Carter · Published: Jul 29, 2026 · Watch: <https://www.youtube.com/shorts/RZpl5X45Hlo> Source: full transcript

Executive Summary

Intermittent fasting is not required to get lean. Whether you follow IF, keto, vegan, or paleo, hitting the correct daily calories and macros is the only thing that determines whether you get shredded.

Intermittent Fasting Is Just One Tool [0:00](#)

- Brandon used intermittent fasting for **5 years straight** and found it effective
 - The sole reason it worked: it naturally reduced how much he ate during the day
 - It was a calorie-control mechanism, not a metabolic magic trick
- You can eat throughout the entire day and still get shredded — meal timing is not the deciding factor
- Any diet structure can work:
 - Intermittent fasting
 - Keto
 - Vegan
 - Paleo

Calories & Macros Are All That Matter [0:20](#)

- The single most important principle:

"Burn more calories than you consume."

- You must know the specific calorie and macro targets suited to your individual goal
 - Generic advice is insufficient — your targets depend on your body and objective

Free Tool: The Ripped Road Map [0:23](#)

- Brandon offers a free tool called the **Ripped Road Map**
- How it works:
 - Enter your height and weight
 - Enter your goal
 - Upload a photo of yourself
 - An AI scans the photo and calculates your exact body fat percentage
 - It tells you how much total body fat you are currently carrying
 - It outputs the precise daily calories and macros you need to hit your goal
- How to get it: comment the word **"road map"** on the video and he will send it to you for free
