

I just built an AI employee that never calls in sick, never sleeps, and works around the clock.

Channel: Brandon Carter · Published: Aug 31, 2026 · Watch: <https://www.youtube.com/shorts/uOWhc4MrLdI> Source: full transcript

Executive Summary

Brandon Carter shows how GoHighLevel lets anyone build a round-the-clock AI employee that automates repetitive communication tasks, so human team members can focus exclusively on closing deals and training.

Contents

-  What the AI Employee Does

What the AI Employee Does 0:00

- Built using **GoHighLevel**, a platform that enables AI agent creation
- Operates 24 hours a day with no downtime, sick days, or sleep
- Capable tasks include:
 - Responding to all incoming leads
 - Answering texts
 - Handling DMs across platforms
 - Following up with prospects
 - Answering common questions
 - Booking appointments directly onto your calendar

Why It Saves Your Team Time 0:23

- The core argument: teams waste significant time on repetitive daily tasks
- An AI agent handles all those repetitive tasks instantly
- Positioned as potentially "one of the cheapest employees you ever hire"
- Caveat: explicitly noted this is **not** a full replacement for every person in a company
 - Meant to absorb repetitive, automatable workload — not complex judgment calls

What's Left for Humans 0:23

- With the AI handling routine communication, the human role narrows to two high-value activities:
 - Getting on sales calls and closing clients
 - Training (team or clients — context unspecified)
- Implied benefit: higher leverage use of human time and reduced operational overhead

Free Trial Offer 0:47

- GoHighLevel trial is available **free for 30 days**
