3 Meta Muse Prompts To Grow Your Instagram

Channel: Brandon Carter · Published: Oct 11, 2026 · Watch: https://www.youtube.com/shorts/D5V0J1rj3lQ Source: full transcript

📋 Executive Summary

Brandon Carter shares three copy-paste MetaMuse prompts that analyze your past performance, repurpose saved inspiration, and reverse-engineer competitor content to generate ready-to-post Instagram scripts in your own voice.

📑 Contents

- 📈 Prompt 1: Analyze & Replicate Your Top Posts
- 💾 Prompt 2: Turn Saved Reels Into New Content Ideas
- 🕵️ Prompt 3: Spy on Competitors & Steal Their Best Formats
- 🛠️ Closing Thoughts on MetaMuse

📈 Prompt 1: Analyze & Replicate Your Top Posts 0:00

- Ask MetaMuse to rank your **top 10 performing posts from the last 6 months**
  - The prompt also requests an explanation of *why* each post worked
    - Forces the AI to surface patterns in format, topic, hook style, or structure that drove performance
- After the analysis, prompt it to write **10 new scripts** modeled on those top performers
  - Scripts are generated in your own voice so they feel native, not generic
  - Goal is content you can post right away without heavy editing

💾 Prompt 2: Turn Saved Reels Into New Content Ideas 0:24

- Instruct MetaMuse to open your **saved folder** and pull from the best 15 saved reels
  - Saved reels are content you already found compelling — a built-in inspiration library
- The prompt asks for those reels to be converted into **video ideas tailored to your audience and voice**
  - Each idea must include a **hook** — the critical opening line designed to stop the scroll

🕵️ Prompt 3: Spy on Competitors & Steal Their Best Formats 0:24

- Start by asking MetaMuse to identify your **top 10 competitors in your niche**
- Then instruct it to analyze all of their top-performing posts over the **last 6 months**
- The breakdown should cover four specific dimensions:

    - Topics they are covering
    - Formats they are using
    - How their hooks are constructed
    - The overall structure of their videos
- Finally, prompt it to write **10 scripts based on those top-performing competitor videos**, but rewritten in your voice for your audience
    - This lets you borrow proven concepts and formats without copying content directly

🛠️ Closing Thoughts on MetaMuse 0:48

- Brandon describes MetaMuse as "an amazing platform" capable of far more than just these three prompts
- The three prompts shown are framed as a starting point — a sample of what the tool can automate for Instagram growth
