

How Built the Body, Business & Life of Your Dreams

EP 322

Channel: Brandon Carter · Published: Aug 07, 2026 · Watch: <https://www.youtube.com/watch?v=AINjpJHbrDs> Source: full transcript

Executive Summary

Episode 322 of Victory Talk covers a detailed 30-day blueprint to make \$10K via a service business using social media and DMs, a live market update on stocks/gold/crypto, and a skill-acquisition framework based on deliberate practice hours.

How to Make \$10,000 in 30 Days: The Math 6:24

- **Start a service-based business** — not a product line; you can't do R&D in 30 days
 - Examples: web development, AI automations, vibe coding, online fitness training
- The math is built backwards from a \$10,000 goal:
 - Goal income: **\$10,000**
 - Price of service: **\$1,000** (Brandon's suggested pricing for online training: 16 weeks for \$997, or \$297/month, or \$80/week — always push for the \$997 full package)
 - $\$10,000 \div \$1,000 = 10$ **sales needed**
 - Assume a **30% close rate** on sales calls → $10 \div 0.30 = 34$ **sales calls per month**
 - $34 \text{ calls} \div 4 \text{ weeks} = 9$ **sales calls per week**

- Sales calls are done via **Zoom** (not phone — more personal, face-to-face feel)
- Assume **5% of DM outreach** converts to a booked call → $9 \text{ calls} \div 0.05 = \mathbf{180 \text{ DMs per week}}$
- $180 \text{ DMs} \div 7 \text{ days} = \mathbf{\sim 26 \text{ DMs per day}}$
- Brandon has helped **over 15,000 students** grow online fitness businesses; many hit 10K in their first month when they approach it with full seriousness

🎯 Picking Your Niche: The Three Major Markets 14:45

- Everything people buy relates to one of three major markets:
 - **Health** (fitness, longevity, energy, mental health)
 - **Wealth** (investing, real estate, career advancement)
 - **Relationships** (marriage, dating/pickup, divorce, polyamory)
- These are too broad — you must **niche down** within them
 - Within fitness alone: bodybuilding, fat loss, glute building, hormone optimization, etc.
 - The niches have niches — go deep
- The framework for defining your niche — answer three questions:
 - **Who** do you want to help? (e.g., men age 25–35)
 - **What** problem do you help them solve? (e.g., getting ripped)
 - **How** do you help them solve it? — this is your **unique mechanism** and is how you differentiate
 - Brandon's early unique mechanism: **HIIT cardio + intermittent fasting**
 - In marketing this is called a "unique mechanism" — it makes you a specialist, not just another fitness person
- Once dialed in, when someone searching for that specific solution finds you, you stand out immediately
- Free AI tool available (link in description) for fitness entrepreneurs: answer ~3 minutes of questions and the AI (trained on Brandon's 20+ years of experience) gives **3–4 profitable niche options** with explanations

🌟 Case Study: Student Jen (Zero to \$100K/Month) 20:19

- Jen had **never been a trainer** before; she was a full-time nurse with two kids and a husband
- Her niche breakdown:
 - **Who:** Moms (not just women — specifically moms)
 - **What:** Getting "toned" (used their language, not trainer jargon — "toned" = muscular + low body fat)
 - **How:** All **at-home workouts**, no gym required
- Results: In April (early in the program) she made **\$49,927** — one day short of \$50K
 - By May she had already hit **\$12,577** partway through the month
 - Eventually scaled to over **\$100,000/month**

"She had a full-time job as a nurse, two boys, and a husband — and she went from zero to over \$100K a month."

Testimonial Harvest: Building Credibility from Scratch 55:01

- **Two paths** based on whether you have testimonials:
 - Path 1: No testimonials → do the "Testimonial Harvest"
 - Path 2: Have testimonials (or your own transformation) → skip to marketing
 - Your own before/after counts as a testimonial (e.g., lost a lot of fat or gained a lot of muscle)
- **The Testimonial Harvest — 3 steps:**
 - Step 1: Find **at least 5 people/clients** to work with **for free** in exchange for testimonials
 - In fitness: work with them for ~1 month (time needed to see noticeable results)
 - **Cheat code:** Find the most out-of-shape/heaviest people you can — fatter people lose fat faster, producing better transformations quickly
 - Step 2: **Get them real results** — work hard on these 5 people
 - In non-fitness services (e.g., web dev), this can happen much faster
 - Step 3: **Monetize those results two ways:**
 - Offer the free clients a **50% discount** to continue working with you (these often become your first paying clients)
 - Use the results/testimonials to **market to new clients**
- Testimonials are critical social proof — like Amazon reviews; people need to see you've helped others before they'll pay

Niche Hacking & Content Strategy on Instagram 1:02:28

- **Primary marketing channel:** Instagram (fastest to get clients)
- Strategy is called **"Niche Hacking"** — find viral videos in your niche and recreate them in your own voice
- You're not looking for just any viral video — find **10x outliers:**
 - Definition: videos that got **10× more views than the creator's follower count**
 - Example: 800K views with 35K followers = 10x outlier 
 - Example: 300K views with 100K followers = NOT a 10x outlier 
 - Example: 700K views with 14K followers = 10x outlier 
- **How to find them (low-cost method):**
 - Search your niche keyword on Instagram (e.g., "men's fat loss")
 - Use **"Sorter for TikTok and Instagram"** (~\$5/month) to sort by views and filter outliers
 - Download the video using the same tool
- Post **at least 3 videos per day** based on 10x outliers

- Free resource: **Viral Content Vault** — a Notion database with ~100 pre-identified fitness 10x outliers, updated weekly; 100% free (link in description)

Using Google Gemini to Recreate Viral Videos 1:04:46

- **Why Gemini:** It's the only LLM that can analyze a raw MP4 file directly; other LLMs struggle with video
- **Process:**
 - Step 1: Download the 10x outlier video
 - Step 2: Drop the MP4 directly into **Google Gemini**
 - Step 3: Prompt: *"Analyze this video that went viral. Break down the structure and why it went viral, and write out the transcript."*
 - Gemini will identify: the hook, value delivery, transitions, call to action, and reasons it went viral
 - Step 4: Prompt: *"I want to make my own version of this video but I don't want to steal it. Recreate it with my own knowledge and experience. Interview me one question at a time until you have enough to write a script in my own words."*
 - Gemini interviews you, then generates your own original script
- Analogy: Like songs in the same key/chord progression — not stealing, just inspired. Different lyrics, melodies, rhythms, BPMs = different song
- Result: Your own content, inspired by proven formats, without copying

Automation, DM Funnels & GoHighLevel 1:12:32

- **The content-to-DM funnel:**
 - Post value-driven content ending with a call to action: *"Comment [keyword] for my free guide"*
 - Software **automatically DMs** everyone who comments with the free guide (lead magnet)
 - Then follow up with a DM script to move them to a sales call
 - Then move them from DM → **Zoom call** → close the sale
- **Lead magnet options:** free guide, checklist, cheat sheet — Brandon calls it the **"Profit PDF"**
- **Recommended tool: GoHighLevel** (sponsor)
 - Brandon runs all his businesses through it
 - Manages leads, sends emails, texts, auto-DMs
 - Can set up automatic Instagram DM replies (like ManyChat, but cheaper)
 - **30-day free trial** available via link in description
 - ManyChat works too but costs more money
- Key insight: You are NOT manually DMing 26+ people per day — you post content that makes people opt in, and automation handles initial outreach; you follow up with warm leads

Case Study: Corey Armstrong (\$45K–\$60K/Month) 1:10:35

- Former struggling personal trainer in Detroit, was broke
- Niche: **Men over 30 getting ripped by optimizing their hormones**
- Uses the 10x outlier + comment automation system:
 - Example video: testosterone supplements advice → *"Comment TEST for my free testosterone guide"* → **300K views, ~5,000 comments**
 - Example video: diabetes advice for men over 40 → *"Comment A1C for the free diabetes guide"* → **200K+ views**
 - Automation (GoHighLevel) sent the guide to all commenters automatically; he then followed up via DM script to book sales calls
- Result: **\$45,000 in a single month** (record at time of clip); routinely does **\$50K–\$60K months**

Market Update with Young Candlestick (Greg) 24:45

- Guest: **"Young Candlestick" Greg** — trades futures live in Victory Trades community
- **Overall market outlook:**
 - Currently in a selloff from a big impulse wave up — may sell **1–2% more** in the short term
 - Should hold support then **bounce bullish into year-end**
 - Stocks historically bullish in **November–December** ("Santa Rally"); bearish in September–October
 - Key indicator to watch: **TLT** (20-year Treasury Bond ETF)
 - TLT sells off → market likely sells off
 - TLT bounces → market likely bounces
 - Japanese yen declining in value; Japan selling US bonds to preserve their currency — creating market ripple effects
 - Fed expected to step in if things get bad to prevent a crash

₿ Bitcoin, Gold, and Key Trade Picks 27:20

- **Gold (GLD):** Both hosts bullish
 - Greg bought more **gold call options** the day of the episode
 - Previous gold call spread already up **20%**
 - "Potential bottom in play as long as these lows hold — \$364 on GLD"
 - Also bullish on **GLTR** (gold, silver, platinum, and other metals ETF — more diversified)
- **Copper:** Called as one of the **main trades of 2026**; new all-time highs
 - Copper leap calls already up **10%** since recommendation
- **Microsoft (MSFT):**
 - Long-term bull case: hits **\$580–\$600** in 1–3 years (fair value just above all-time highs)
 - Still has **20% upside** from current levels; any 20% dip = buy
 - Leap call options up **300%** since earlier recommendation; shares up **40%**

- Revenue driven primarily by **Azure cloud computing**, not hardware; also owns GitHub, LinkedIn, large investments in OpenAI and Anthropic
- Trade idea: Buy Dec 2026 **500 call / sell 550 call** spread → risk ~\$2,000 to make ~\$5,000
- Advanced butterfly: Buy 500 call, sell two 550 calls, buy 600 call → risk ~\$850 to make ~\$5,000 (lower probability, needs price to land near 550)
- **Apple (AAPL):**
 - Currently ~\$312; expected move by year-end: **+/- \$45** (range ~\$270–\$355)
 - Broke above and held \$312 as support
 - Greg rates the trade **6–7 out of 10**
 - Simple spread: Buy 310 call / sell 320 call → risk **\$475** to make **\$1,000** if Apple finishes slightly higher
 - Catalysts: new iPhone, MacBook Ultra with M5, Mac Mini refresh
 - Risk: news may already be priced in; chart "not super bullish" but not bearish
- **Service Now (NOW):**
 - Bull flag at **\$120**; fair value **\$160** (33% upside); stop at \$106
 - Greg has call options; prefers this over Apple
- **RTX (Raytheon):** All-time high breakout; part of defense sector rotation; Greg bought call options
 - Also watching **ITA** (defense ETF) at all-time highs pulling back slightly
- **Google (GOOGL):** Greg bought shares — retesting the trend line; may be slightly early but comfortable with short-term red
- **NVDY:** Option income ETF on Nvidia (the "wheel" strategy automated); Greg bought this instead of Nvidia directly
- **TSM:** Breakout over **\$430**; long-term hold, don't trade it
- **SpaceX:** Greg no longer shorting it; not calling a bottom but stepping aside
 - Wheel strategy: need ~\$11,000 to make ~\$500/week; requires tolerance for drawdown
- **Bitcoin:** Both hosts bearish/neutral
 - "Dead market" — same price since June (around \$60–67K range)
 - Greg would only get interested above **\$80K–\$100K** (confirmation of new uptrend)
 - Brandon: "Invest in yourself instead of Bitcoin"
- **Victory Trades community highlights:**
 - Jeremiah Davis passed a **\$300,000 funded account** (required making \$30K in a month)
 - Chase (3 weeks of trading experience): pulling **\$100–\$500/day**
 - Greg: made ~\$500 on funded accounts that day, ~\$700–800 the prior day
 - PJ: ~\$1,000; Simus: ~\$1,300; JD Davis: ~\$4,000
 - Membership: **\$100/month** — includes beginner course, options course, futures course (previously sold for thousands separately), live trade alerts from Greg and Bryce, live futures trading room

- Core premise: **"It only takes 1,000 hours to be really good at something"** — better than almost everyone you meet
 - Malcolm Gladwell's *Outliers* says 10,000 hours for world-class; Brandon says 1,000 is the practical threshold for success

- **The Skill Acquisition Matrix:**

Hours	Level
100 hours	Not bad (tolerable; people aren't laughing at you)
1,000 hours	Good (people genuinely say "he's good")
2,000 hours	Really good ("panties-throwing" level)
5,000 hours	Amazing
10,000 hours	One of the best in the world
20,000 hours	Legend (statues, jerseys retired)

- **How long it takes to hit 1,000 hours by daily practice:**

Hours/Day	Time to 1,000 Hours
1 hour/day	~3 years
2 hours/day	~1.5 years
3 hours/day	~1 year
4 hours/day	~8–9 months ← Brandon's recommended sweet spot

- Brandon's personal system: every **9 months** he picks a new skill, works on it **4 hours/day**, and tracks every hour in a Notion database
 - Says 9 months (not 8) to account for travel, illness, emergencies (~50 flights/year)
 - "Every nine months I'm reborn like a baby"
- **Why most people fail — the Quitting Zone:**
 - People expect **linear results** (effort → proportional improvement over time)
 - Reality: skill acquisition is **exponential** — very slow early progress, then rapid acceleration
 - Most people quit during the early flat zone before the curve kicks in
 - Once you start enjoying the skill (~200–300 hours in), you put in more work → results become exponential
 - "Most people I meet aren't good at anything because they end up in the quitting zone"
- **The mindset shift:**
 - Don't judge yourself by daily improvement or outcomes
 - **Judge yourself only by hours logged** — if the hours are going in, improvement is inevitable
 - "If I put in that much time on something, I have to get good at it"

- Around 100 hours you'll hit frustration — look at your hour count and recognize "I'm exactly where I'm supposed to be"
- At **200 hours**, people around you will notice improvement — keep going anyway; don't plateau at "good enough"

"Skill acquisition is nothing but hours. Within reason, anyone can be good at anything."

- **Action steps:**

- Pick **one skill** you want to master that can make you money
- Schedule **4 hours/day** in your calendar (can be split: 1 hr morning, 1 hr after lunch, 1 hr after work, 1 hr before bed)
- If you miss days, compensate with longer blocks on weekends
- **Track every hour** in a spreadsheet, Notion database, or app
- Commit to ~9 months as your investment horizon
- For online fitness coaches: prioritize **lead generation** and **content creation** as your first skills

? Q&A / Super Chats [1:18:17](#)

- **Patrick — Info products vs. coaching/mentorship:**

- Info products: one-time sale, high perceived value, but you're always hunting for new buyers
- Coaching: **recurring revenue** (MRR/ARR); every new client = a raise; less daily hustle required
- Brandon strongly prefers coaching for sustainable income

- **Mateo (27, \$100K saved, Michigan) — Online fitness trainer for expats:**

- Brandon's verdict: not a great niche — "I don't think there's enough of them on Earth"
- Recommended he use the free AI niche finder tool (link in description) to think outside the box

- **Stephen — Waking up at 3 AM but falling asleep at the table:**

- Brandon's routine:
 - Get **7 hours of sleep** (non-negotiable)
 - Prepare pre-workout the night before; place it next to workout clothes
 - Drink **300mg caffeine** immediately upon waking
 - **Meditate for 15 minutes** — caffeine kicks in (~30 min) right as meditation ends
 - Blast **early 2000s gangster rap** (e.g., T.I.'s new album) to get hyped

- **Darius — Drone business app (FAA certs, quizzes, marketplace):**

- Brandon honest: doesn't know the drone industry well enough to advise; "I don't want to pretend I know what you're talking about"

- **Alexander (super chat):** Thanked Brandon for encouragement; has been putting in more work and seeing results coming through — Brandon celebrated this
