

Want to make \$20,000 a month as an online fitness trainer?

Channel: Brandon Carter · Published: Aug 07, 2026 · Watch: <https://www.youtube.com/shorts/hFlokktynrE> Source: full transcript

Executive Summary

Brandon Carter walks through a simple reverse-engineering formula that converts a monthly income goal into a daily DM count, using assumed close rates and outreach ratios — plus a free AI tool to personalize the roadmap.

The \$20K/Month Math Formula 0:00

- The core idea is to **reverse-engineer your income goal** into a single daily action (DMs sent)
 - Every number flows from the one before it, so you only need your target income and your coaching price to start
- Step-by-step formula:
 - Step 1 — Divide your monthly income goal by your coaching price
 - Result: number of sales (clients) you need per month
 - Example anchor: \$20,000 goal
 - Step 2 — Divide that number by a **30% close rate**
 - Result: number of sales calls you need to book each month
 - Assumes roughly 1 in 3 people on a call will buy
 - Step 3 — Divide monthly calls needed by 4
 - Result: number of sales calls to book per week
 - Step 4 — Divide weekly calls by 7
 - Result: number of sales calls needed per day
 - Step 5 — Divide daily calls by a **5% outreach-to-book-call ratio**
 - Result: exact number of DMs you must send every day
 - Assumes 1 in 20 DMs converts into a booked sales call

The formula turns an overwhelming income goal into one repeatable daily habit: send a specific number of DMs.

- Key assumed benchmarks used in the formula:

Metric	Assumed Rate
Sales call close rate	30%
Outreach (DM) to booked call rate	5%

Free AI Tool: Fitness Business Roadmap 0:23

- Brandon offers a free tool called the **Fitness Business Roadmap**
 - Described as an AI-powered tool, not a static PDF or course
- How it works:
 - Step 1 — Answer approximately 9 questions
 - Step 2 — The AI analyzes your answers and your profile
 - Step 3 — It outputs the exact steps you need to take to hit your specific income goal
- Analogy used: "It works just like a GPS — once you tell it where you are, it's going to tell you the exact route you need to take to hit your goal"
- How to access it: comment the word **GPS** on the video and Brandon sends it directly to you
