

I Sleep On Ice Cold Water Every Night #shorts

Channel: Brandon Carter · Published: Jul 08, 2026 · Watch: <https://www.youtube.com/shorts/NGdU8p-olsE> Source: full transcript

Executive Summary

Brandon Carter uses the Chili Pad, a \$1,300 water-cooled mattress cover set to 55°F, to stop night sweating and improve sleep quality, citing studies that cooler sleeping environments produce better rest.

Contents

-  The Problem: Sleeping Hot and Night Sweats
-  The Solution: The Chili Pad
-  How It Works
-  Benefits and Recommendation

The Problem: Sleeping Hot and Night Sweats 0:00

- Brandon describes getting very hot during sleep and sweating profusely every night
 - This was a consistent, ongoing issue before he found a solution

The Solution: The Chili Pad 0:10

- He purchased a product called the **Chili Pad**
 - Price: **\$1,300**
 - His verdict: "worth every penny"

How It Works 0:14

- The Chili Pad is a mattress cover that sits on top of your existing mattress
 - Tubes extend out of the mattress cover and connect to a base unit
 - The base unit is filled with water
 - You set your desired temperature on the base unit
 - Brandon sets his to **55°F**
 - The unit chills the water and circulates it through the mattress pad continuously

Benefits and Recommendation 0:22

- Regulates body temperature throughout the night

- Stops night sweating entirely
- Studies show that sleeping in a colder environment leads to significantly better sleep quality
- Brandon's recommendation: if you can afford it, invest in a Chili Pad
