📋 Executive Summary

ZssBecker announced that a custom attribution model and call-labeling feature is coming to the HYROS app in two weeks, and offered to build it for users who don't want to set it up themselves.

Oct 14, 2026 · 8:26 AM

@TheWillRivera Not gonna comment too much. Biased. Callix is focused on B2B calls. HYROS is focused on accurate long tracking for any model.

My bigger two cents: I don't think anyone will be using Callix/The HYROS app in a year. 1 size fits all SaaS is dead. What they will be using is 100%

@TheWillRivera ALSO FYI : For anyone reading this whose like

"But I dont want to build that"

A) It's about to be in HYROS app itself in 2 weeks. So you can just log in and say "I want this attribution model and bad calls (on transcripts) labeled. Done.

BUT B) We just will build it for you

@mattfle02898557 @TheWillRivera App wise. Dont need too.

Same way AWS doesnt support every site that builds with it.

The person with the app literally has Claude. It can fix anything faster than a dev or support person can.

Tracking wise, the controls/settings are controlled by a central dashboard, same

@TheWillRivera ...@TheWillRivera

For what it's worth. I originally designed Hyros specifically for webinar funnels on your site.

I saw you were running that. We slay that. Absolutely slay it.

If you book a demo just lemme know and happy to get our best people on setting up your tracking
