The Six-Figure Formula 0:00

- The core premise: you only need **25 clients** to earn over six figures a year as an online personal trainer
 - This is presented as a low, achievable target — not a massive audience or complex funnel
- Charge each client **\$80 per week**
 - Explicitly noted as "way less than in-person training," making it an easier sell to potential clients
- The math:
 - $25 \text{ clients} \times \$80/\text{week} \times 52 \text{ weeks} = \text{\$104,000/year}$
 - The only condition: maintain an average of 25 clients consistently across the full year
