

20,000 a day will get you super RIPPED.

Channel: Brandon Carter · Published: Sep 04, 2026 · Watch: <https://www.youtube.com/shorts/qMgkckSwsh4> Source: full transcript

Executive Summary

Brandon Carter, with 27 years of coaching experience, argues that 20,000 steps per day gets people into the best shape of their lives — and breaks it into four practical walking blocks that fit a standard daily schedule.

Contents

-  The Core Claim
-  The 20,000-Step Daily Schedule
-  The Cheat Code: Hourly Work Walks
-  Expected Results

The Core Claim 0:00

- **20,000 steps per day** is the target that Carter credits with getting people "super ripped"
 - Backed by 27 years of personal training experience
 - Claims every single client who has done this got into the best shape of their life

The 20,000-Step Daily Schedule 0:00

- The goal is split into distinct walking blocks throughout the day:
 - **Morning** — walk 30 minutes immediately after waking up (~3,000 steps)
 - **After lunch** — walk another 30 minutes (~3,000 steps)
 - **After work** — walk 60 minutes (~6,000 steps)
 - Suggested as a social walk with family or friends
 - **At work (hourly)** — 10-minute walk every hour over an 8-hour workday (~8,000 steps; see next section)

Block	Duration	Approx. Steps
Morning walk	30 min	~3,000
After-lunch walk	30 min	~3,000
After-work walk	60 min	~6,000
Hourly work walks (×8)	10 min each	~8,000
Total		~20,000

The Cheat Code: Hourly Work Walks 0:23

- Set an alarm every hour during an 8-hour workday and take a 10-minute walk
 - Doesn't need to be formal — walk around the office, go to the water cooler, take "bathroom laps"
 - Framed as the key that makes hitting 20,000 steps achievable on a busy schedule

Expected Results 0:46

- Carter claims visible results in **approximately one month** of following this routine
 - Promises significant fat loss ("lose a bunch of fans" — likely a slip/joke for "pounds" or "fat")
 - Described outcome: "amazing shape"
