- Consume **at least 1 gram of protein per pound of bodyweight** daily
 - Ensures muscle preservation and growth, especially important when eating in a calorie deficit

Habit 3: Calculate and Cap Your Calories 0:00

- Use this simple formula to set your daily calorie ceiling:
 - Take your bodyweight in pounds

 - Example: a 200 lb person caps intake at 2,000 calories/day

Habit 4: Full-Body Training 3–4× Per Week 0:00

- Train your **entire body 3 to 4 times per week**
- Session structure:

 - Short rest periods keep intensity high and workouts time-efficient

Habit 9: Use a Meal Prep Delivery Service 0:22

- Have a **meal prep company deliver food weekly**
 - Eliminates time lost to cooking, cleaning up after meals, and grocery shopping
 - Pairs with the calorie and protein habits — removes friction from eating correctly

- Same philosophy as the housekeeper habit: **outsource logistics to maximize productive and healthy behaviors**
