3 Video Styles Every Trainer Should Post

Channel: Brandon Carter · Published: Oct 21, 2026 · Watch: https://www.youtube.com/shorts/TG5VbdwhKv8 Source: full transcript

📋 Executive Summary

Brandon Carter outlines three simple video formats online fitness trainers should use to grow their audience and attract clients, all produced quickly using AI tools like Claude or ChatGPT with minimal editing effort.

📑 Contents

- 🎙️ Style 1: The "Talking" Video
- 🎬 Style 2: The Montage
- 🖥️ Style 3: The Presentation
- 🚀 Final Takeaway

🎙️ Style 1: The "Talking" Video 0:00

- Speak directly into your phone — the simplest format to execute
  - AI automatically removes all filler words, stutters, and repeated takes
  - Captions/subtitles are added automatically
  - AI can even overlay images above your head for visual context
- Ideal when you want to deliver information conversationally without heavy production

🎬 Style 2: The Montage 0:08

- A pure b-roll format — no talking required
  - Clip your existing footage and cut it to a beat/rhythm
  - Add a single text line at the top to convey the message
- Good option for trainers who are camera-shy or want a visually dynamic post without speaking

🖥️ Style 3: The Presentation 0:14

- This is where Claude (or ChatGPT) "shows its skills" according to Brandon
  - Graphics/visuals displayed at the top of the screen
  - Presenter appears at the bottom of the screen
  - Something new appears on screen every few seconds to maintain viewer attention
- The AI handles: captions, background music, and b-roll footage integration

    - Brandon's only manual task: adding his own footage clips
    - No scripting, no timeline management, no traditional editing required

🚀 Final Takeaway 0:28

- Pick ONE of these three styles and start posting consistently
    - Use it as a system to grow your following and convert viewers into paying online coaching clients
- The core appeal: all three styles are low-friction and AI-assisted, removing the usual barriers of scripting, editing, and production time
