I Deleted Every Editing App

Channel: Brandon Carter · Published: Oct 21, 2026 · Watch: https://www.youtube.com/shorts/9K0DhKGr7l8 Source: full transcript

📋 Executive Summary

Brandon Carter replaced every traditional video editing app with Claude, using plain-language prompts to edit raw footage — removing mistakes, adding graphics and B-roll, and generating multiple versions to choose from.

📑 Contents

- 🗑️ Deleting All Editing Apps
- 🤖 What Claude Can Do With a Prompt
- ⚙️ The Actual Editing Workflow

🗑️ Deleting All Editing Apps 0:00

- Removed every editing tool from his phone: **CapCut**, **Edits**, and **Premiere**
  - Replaced the entire editing stack with Claude
  - Key point: he describes himself as "not a video editor" — this workflow requires no editing skill

🤖 What Claude Can Do With a Prompt 0:05

- All instructions are given in plain language — no timeline, no technical settings
- Example prompts he uses:
  - "Make my top performing reels rotate around me" — motion/layout effect
  - "Make this a motion graphic style video" — full stylistic treatment
  - "Add a wall of my own photos behind me" — custom background using personal assets
  - "Add B-roll over me talking" — overlay supplementary footage on top of talking-head clips

⚙️ The Actual Editing Workflow 0:23

- Step 1 — Upload the raw footage to Claude, nothing else required
- Step 2 — Claude automatically edits out retakes, stumbles, and filler words
- Step 3 — Claude adds whatever graphics, photos, or B-roll was requested via prompt
- Step 4 — Claude produces a few different versions to choose from
- Step 5 — Creator picks the best one

> The entire editing process is reduced to uploading raw footage and describing what you want in plain language — no software skills needed at any step.
