

# You can't out-train a bad diet, but you CAN out-diet sub-optimal training <sup>100</sup>

Channel: Brandon Carter · Published: Jul 24, 2026 · Watch: <https://www.youtube.com/shorts/9QVuldGUTUI> Source: full transcript

## Executive Summary

---

Brandon Carter argues that diet is the single most important factor for getting shredded — good nutrition can compensate for poor or minimal training, but training can never compensate for a poor diet.

### Diet vs. Training: What Actually Gets You Shredded 0:00

---

- Can you get shredded lifting only three days a week?
  - Answer: Yes, absolutely.
- You don't even need to lift or work out at all if your sole goal is getting shredded
  - The driving factor is diet, not training volume or frequency.
- Core principle stated directly:
  - "You can't out-train a bad diet, but you can out-diet bad training."
- Training is secondary to nutrition when it comes to body composition
  - Suboptimal training can be offset by dialing in your diet
  - A bad diet cannot be offset by any amount of training
