

Build a 10-Out-of-10 Day

Channel: Brandon Carter · Published: Sep 30, 2026 · Watch: <https://www.youtube.com/shorts/70hJxKDEp2c> Source: full transcript

Executive Summary

Brandon Carter breaks down his ideal productive day: wake at 5 AM, stack deep work before distractions hit, train hard, handle lighter tasks later, create content, and get 8,000 steps through two walks — all done by 10 PM.

Contents

-  Wake Up & Morning Routine
-  3 Hours of Deep Work
-  90-Minute Full Body Workout
-  3 Hours of Medium Work
-  First 40-Minute Walk
-  2 Hours of Easy Work
-  2 Hours of Content Creation
-  Evening Walk, Dinner & Sleep

Wake Up & Morning Routine 0:00

- Wake up at **5:00 AM** — no exceptions, no snooze button
 - "The snooze button is for people who choose to be poor"
- Morning routine capped at **15 minutes max**
 - Goal is to avoid wasting time on "a bunch of BS"
 - Get to work as soon as possible after waking

3 Hours of Deep Work 0:07

- First major block of the day is **3 hours of deep, cognitively demanding work**
- To eliminate distraction, phone goes in the bathroom during this block
 - Physical separation from the phone prevents temptation to check it

90-Minute Full Body Workout 0:16

- **90-minute full body workout** follows the deep work block
- Option to split into three 30-minute sessions spread throughout the day

- Brandon does this sometimes because he has a gym in his condo building — just go downstairs
- His recommendation for most people: do it all at once since commuting to a gym makes splitting impractical

3 Hours of Medium Work 0:27

- **3 hours of medium work** — less cognitively demanding than the morning deep work block
 - Includes: calls, emails, meetings
 - Reserved for tasks that don't require peak mental focus

First 40-Minute Walk 0:33

- A **40-minute walk** targeting approximately **4,000 steps**
- Multitask during this walk to stay productive:
 - Take calls
 - Respond to people in Slack
 - Reply to emails

2 Hours of Easy Work 0:44

- **2 hours of easy/administrative work** — lowest cognitive demand tasks
 - Examples: administrative tasks, routine to-dos
- Cheat code to maintain focus: **change your physical location**
 - Go to a coffee shop
 - Move to a different room in your home
 - The environmental shift helps re-engage attention for otherwise tedious work

2 Hours of Content Creation 0:54

- **2 hours dedicated to content** at the end of the work day
 - For Brandon this means making YouTube videos and Instagram Reels

Evening Walk, Dinner & Sleep 1:04

- After dinner: a **second 40-minute walk** for another **4,000 steps**
 - Total daily step count: **~8,000 steps** across both walks
 - This walk doubles as family/social time:
 - Walk with your kids
 - Walk your dog
 - Walk with your girlfriend/partner

- "This way you can get your steps in and still bond with your loved ones"
- Dinner timing is flexible — walk can happen before or after, whatever fits the schedule
- **Asleep by 10:00 PM** to be ready to wake at 5 AM and repeat

"Do this for 7 days and watch how your life improves."
