

28 Rules to Get Rich

Channel: Brandon Carter · Published: Sep 30, 2026 · Watch: <https://www.youtube.com/shorts/iS1DUOIAHCI> Source: full transcript

Executive Summary

A rapid-fire list of 28 actionable wealth-building rules covering income strategy, skill development, mindset, audience building, spending discipline, and the habits that separate high earners from everyone else.

Contents

- 💰 Income & Time Rules
- 📊 Know Your Numbers
- 🛠 Sales & Skill Development
- 🤖 AI, Focus & Productivity
- 🧠 Mindset & Environment
- 📣 Audience & Marketing
- 💵 Money Management
- 🚀 Action & Execution

Income & Time Rules 0:00

- **Stop trading time for money** — the foundational shift required to build real wealth
- Prioritize active income first before worrying about passive income
 - You need cash flow now before systems can work later
- Do the tasks that make you money before the tasks that merely make you *feel* productive
 - Revenue-generating work comes first, busywork comes last
- **Do not quit your job** until your side business earns at least double your current salary
 - This protects you from desperation-driven bad decisions
- Only borrow money for things that will genuinely generate more money
 - Debt on assets = acceptable; debt on lifestyle = dangerous
- Buy assets before you start showing off
 - Build the foundation silently; flexing comes after, not before

Know Your Numbers 0:00

- Know every key business metric at all times:

- **Lifetime Value (LTV)** of a customer
- **Customer Acquisition Cost (CAC)**
- **Return on Ad Spend (ROAS)**
- Solve problems that people are *already paying others to fix*
 - Proof of willingness to pay already exists — you just need to provide the solution
- Do not take financial advice from broke people
 - The source of advice matters as much as the advice itself

Sales & Skill Development 0:00

- **Record your sales calls**, listen back, and study them like game film
 - Identify where you lose deals, where you stumble, what objections recur
 - Treat every call as data for improvement
- Dedicate **at least 90 minutes every day** to learning one high-income skill
 - Consistency over a single skill compounds faster than scattered effort
- Ask for a raise or raise your prices
 - "People don't give money to those who don't ask for it"
 - The wealthy are not smarter — they are simply better at asking for money
- **Learn how to sell** — framed as the single most transferable wealth skill
- Pay for expert guidance to shorten your learning curve and start earning faster
 - Mentorship is an investment with measurable ROI in time saved

AI, Focus & Productivity t=22s

- Train AI to handle any task you find yourself doing **more than 3 times per week**
 - Repetition is a signal to automate — reclaim that time for higher-leverage work
- Put your phone in another room while working to eliminate distraction
- Check your screen time every Sunday, then try to cut it in half the following week
 - Treat screen time as a weekly metric to actively manage and reduce

Mindset & Environment t=44s

- Once a month, sit in a room with someone who earns **10× what you earn**
 - Environment shapes expectations and expands your sense of what is possible
- Sleep **7 hours every night**
 - "You cannot make good decisions when you are tired"
- Stop caring what other people think — most people are not thinking about you as much as you assume

- Stop comparing your **Chapter 3** to someone else's **Chapter 30**
 - You are at different stages; the comparison is meaningless and damaging
- If your friends mock your dreams, cut them off
 - "You don't need them" — your circle either elevates or limits you
- Do not announce your goals publicly
 - It looks more impressive if you achieve them and no one knew you were working on it
 - If you fail or change direction, no one knows — lower social cost of pivoting
- If you are living for Fridays, you need to start fixing your Mondays
 - Hating your work week is a signal to restructure your life, not just endure it
- If you wait until you feel ready, you will never start
 - Readiness is a feeling that rarely arrives on its own — action precedes confidence

Audience & Marketing t=65s

- Post **3 to 5 times per day for 90 days straight**
 - "I bet you will get some clients" — volume and consistency create inbound opportunity
- Build your audience **before you need it**
 - Your followers are your future customers — grow the asset in advance

Money Management t=65s

- Save and invest **at least 20% of your income**
 - Non-negotiable floor — build the habit regardless of income level

Action & Execution t=86s

- The rich are not smarter than you

"They are just better than you at asking for money."

- Every rule above is meaningless without execution — the consistent theme is *do it now*, not later
