🛠️ Building Lead Magnet Tools with GoHighLevel AI Studio 0:00

- GoHighLevel has an AI Studio feature that works similarly to Lovable — it lets you "vibe code" (build via natural language prompting) your own websites and tools
  - No traditional coding required; you just talk/prompt the tool with changes you want
  - Brandon uses voice input (Whisper) to dictate prompts and make changes on the fly
- He demonstrates from his own fitness sub-account inside GoHighLevel
  - He has built multiple tools, including:
    - A **RIP Road Map** tool
    - A macros calculator (tells users what macros they need to build muscle or lose weight)
    - A diet plan generator (creates a free personalized diet plan)
  - Notes you can build as many of these tools as you want within GoHighLevel
- Key insight: free AI-generated tools have **high perceived value** to prospects, making them effective lead magnets

📬 Capturing Leads and Multi-Touch Follow-Up Strategy 0:46

- The lead magnet tool is connected directly to GoHighLevel's CRM
  - When a user engages with the tool, GHL captures their **phone number and email**
  - This turns a one-time tool interaction into an ongoing follow-up opportunity
- Follow-up channels unlocked after lead capture:

    - SMS text messages
    - Email sequences
- The result is **four distinct shots** to get the prospect on a sales call:
    - Shot 1 — Initial engagement with the free tool
    - Shot 2 — Thank you page with a call-booking option displayed immediately after tool use
    - Shot 3 — Follow-up text message if they don't book from the thank you page
    - Shot 4 — Follow-up email sequence

> "We started off with just one shot… now we got four shots to get them on a sales call."

🎁 Offer and Call to Action 1:09

- Brandon promotes GoHighLevel directly in the video
    - A **free 30-day trial** of GoHighLevel is linked in the description
    - Applies to any industry, not just fitness — the fitness account shown is just one example sub-account
