Editing With Claude Isn't Complicated

Channel: Brandon Carter · Published: Oct 28, 2026 · Watch: https://www.youtube.com/shorts/KlSK_u0Nz8k Source: full transcript

📋 Executive Summary

Brandon Carter argues that AI-assisted video editing with Claude or ChatGPT is far simpler than people make it sound — drop in clips, type a prompt, and the AI handles the rest.

📑 Contents

- 🎬 The Core Claim: AI Editing Is Easy
- 🌀 Example Effects Shown
- 🛠️ The Basic Workflow

🎬 The Core Claim: AI Editing Is Easy 0:00

- People online make AI video editing sound far more complicated than it actually is
  - Both Claude and ChatGPT are cited as tools capable of producing impressive effects
- No advanced technical knowledge required — framed as accessible to anyone
  - "You ain't even got to be a tech nerd or cyber bully to know how to do" it

🌀 Example Effects Shown 0:00

- "Reels circling around you" effect demonstrated as a flagship example
- An "action hero" style effect is also shown as another achievable output

🛠️ The Basic Workflow 0:00

- The process as described is minimal and straightforward:
  - Step 1 — Start with clips that are "rigged really well" (well-shot or well-structured source footage)
  - Step 2 — Drop the clips into the AI tool (Claude or ChatGPT)
  - Step 3 — Type a skill/prompt describing the effect you want
  - Step 4 — The AI does all the work and produces the effect
- The transcript cuts off mid-sentence, so no further detail on specific prompts or settings was provided
