

# 4 Steps To Get More Online Training Clients Fast

Channel: Brandon Carter · Published: Jul 10, 2026 · Watch: <https://www.youtube.com/shorts/iZNyNApzHbl> Source: full transcript

## Executive Summary

Brandon Carter (2M+ followers) breaks down the exact 4-step system he'd use to rebuild his online fitness business from zero: competitor-backed content research, AI-assisted scripting, automated free-guide delivery, and DM-to-sales-call conversion.

## Contents

-  Step 1: Focus on Short-Form Content & Find Winning Ideas
-  Step 2: Use Google Gemini to Reverse-Engineer Viral Videos
-  Step 3: Post 2–3 Videos Per Day Using GoHighLevel
-  Step 4: Give Away Free Guides & Convert Followers into Clients

## Step 1: Focus on Short-Form Content & Find Winning Ideas 0:00

- Short-form content is the fastest growth channel — prioritize it above everything else
  - Platforms to focus on: **Instagram Reels, TikToks, and YouTube Shorts**
- Don't guess what to post — reverse-engineer what's already working
  - Make a list of the top creators in your niche
  - Go to their Instagram pages and install the **Sorter Chrome extension**
    - Sorter ranks a creator's videos by most views, surfacing their best-performing content
  - Identify the top videos you want to model and download them directly using the Sorter extension

## Step 2: Use Google Gemini to Reverse-Engineer Viral Videos 0:21

- Upload each downloaded video into **Google Gemini** for analysis
  - Key reason to use Gemini over other AI tools: it is currently the only LLM that accepts raw MP4 video files and can analyze them directly
- Prompt Gemini to do three things for each video:
  - Explain why the video went viral
  - Rewrite the script in your own voice
- Manually edit the AI-generated script afterward
  - Carter's note: tweak it further so "you don't sound like a goddamn robot"

### Step 3: Post 2–3 Videos Per Day Using GoHighLevel 0:44

---

- Target posting cadence: **2–3 videos per day, 7 days a week**
  - This volume removes guesswork because every post is based on proven top-performing content
- Use **GoHighLevel** to schedule and distribute posts across all platforms simultaneously
  - Reduces manual effort and keeps the publishing cadence consistent

### Step 4: Give Away Free Guides & Convert Followers into Clients 1:08

---

- Create free guides and offer them inside your videos as a lead magnet
- Use **GoHighLevel's Instagram automation** to deliver the guide automatically
  - Set it up so that when a viewer comments a specific trigger word, they are sent the guide via DM automatically
- Once someone requests the guide, go into DMs and start a real conversation with them
  - These are warm leads — they already engaged with your content and opted in
  - Goal: book them on a **sales call** and close them as online training clients

If you run this entire system consistently for **90 days**, Carter believes you will have dramatically grown your following AND landed online training clients in the process.

- Tools referenced in the full workflow:
  - **Sorter** (Chrome extension) — ranks and downloads competitor videos by view count
  - **Google Gemini** — analyzes MP4 videos and rewrites scripts
  - **GoHighLevel** — schedules posts across platforms and automates Instagram DM delivery
