10 Out Of 10 Male Habits (Part 3)

Channel: Brandon Carter · Published: Oct 12, 2026 · Watch: https://www.youtube.com/shorts/bo04jVB-3XM Source: full transcript

📋 Executive Summary

Brandon Carter presents three escalating "10 out of 10" male habits: read 90 minutes daily to stay competitive, work 80 hours a week to outpace peers, and invest the surplus — showing that $2,000/month in the S&P 500 compounds to $1.3M over 20 years.

📑 Contents

- 📖 Habit 1: Read 90 Minutes Every Day
- 💼 Habit 2: Work 80 Hours a Week
- 💰 Habit 3: Earn More Than You Spend and Invest the Difference

📖 Habit 1: Read 90 Minutes Every Day 0:00

- Read for **at least 90 minutes** every single day
  - The core reasoning: the world is constantly improving and your competitors are always evolving
  - If you are not continuously learning, competitors will pull far ahead of you
  - Continuous reading is framed as a non-negotiable baseline for staying relevant and competitive

💼 Habit 2: Work 80 Hours a Week 0:00

- Work **80 hours per week** — double the output of the average person
  - Carter states he has personally maintained this habit for approximately **20 years**
  - His core argument: it is genuinely difficult *not* to become wealthy over a long period of time if you are working twice as much as everyone else
  - The habit is most powerful when combined with the third habit below

💰 Habit 3: Earn More Than You Spend and Invest the Difference 0:21

- The rule: **earn more than you spend, and invest the difference**
  - Carter calls this essentially foolproof over a sufficient time horizon: "there is no way" to avoid becoming wealthy if you do this long enough
- Concrete example provided:
  - Invest **$2,000 per month** into an **S&P 500 index fund**
  - The S&P 500 averages approximately **10% annual returns**

    - Result: **$1.3 million** accumulated over **20 years**
- Tie-back to Habit 2:
    - If you are already working 80 hours a week, Carter argues there is no reason you cannot free up an extra $2,000 per month to invest
    - The three habits are designed to reinforce each other: more knowledge → more productive work hours → more surplus income → more invested wealth
