How My Girlfriend Got 1,000 Followers Overnight

Channel: Brandon Carter · Published: Oct 29, 2026 · Watch: https://www.youtube.com/shorts/oc1l0OKGrik Source: full transcript

📋 Executive Summary

Using Claude AI and an app called Composeio, Brandon Carter helped his girlfriend gain 1,000 followers overnight by ranking her past reels, identifying winning patterns, and replicating what already worked.

📑 Contents

- 🚫 The Problem with Random Posting
- 🛠️ Step 1: Rank Every Reel with AI
- 🔍 Step 2: Break Down the Patterns
- 🏆 Step 3: Make More of the Winners
- 🔁 Step 4: The Weekly Check (What Most People Skip)

🚫 The Problem with Random Posting 0:00

- Most people post based on whatever they feel like or ideas they come up with on the fly
  - This is unstructured and data-blind — no feedback loop guiding content decisions
  - The fix is to let past performance data drive future content choices

🛠️ Step 1: Rank Every Reel with AI 0:00

- They gave **Claude** (Anthropic's AI) access to her Instagram through an app called **Composeio**
  - Composeio connects Claude to Instagram so it can read post-level analytics
  - Claude then ranks every reel she has ever posted by three metrics:
    - Views
    - Shares
    - Saves
- She asked Claude to surface her **top 10 reels** by that ranking

🔍 Step 2: Break Down the Patterns 0:23

- The ranking alone tells you *what* worked but not *why*
- Claude was asked to analyze her **top 5 reels** and her **bottom 5 reels** across three dimensions:
  - Hook — how the video opened and grabbed attention

    - Length — duration of the reel
    - Topics — subject matter covered
- The goal was to identify repeatable patterns from the winners and avoid the traps of the losers

🏆 Step 3: Make More of the Winners 0:46

- Using the pattern analysis, she created a single reel that **encapsulated all the traits of her top performers**
    - Combined the winning hook style, length, and topic patterns into one video
- She posted that reel and gained **1,000 followers overnight**

🔁 Step 4: The Weekly Check (What Most People Skip) 0:46

- Every **Sunday** she runs the same analysis process
    - Checks what performed well that week to determine what she should post the following week
- This is described as the step most creators forget — turning a one-time win into a consistent, repeatable system

> The core insight: stop posting from intuition and start posting from data. Let AI surface what your own audience already told you they want.
