Step 1: Do the Math First — Reverse-Engineer Your Revenue Goal 0:23

- Before filming a single reel or sending a DM, calculate exactly how many leads you need
- Start with your revenue goal: **\$20,000/month**
- Work backwards through four numbers:
 - **Average cash collected per call** — e.g., \$1,000 for experienced coaches, \$300 for beginners
 - **Close rate** — e.g., 25% (not the best closer)
 - **Show rate** — e.g., 80% (no one has 100%)
 - **Lead-to-booking rate** — e.g., 10% of DM conversations result in a booked call

Metric	Example Number
Revenue goal	\$20,000

Metric	Example Number
Avg cash per call	\$1,000
Sales needed	20
Close rate	25% → need 80 completed calls
Show rate	80% → need 100 booked calls
Lead-to-booking rate	10% → need 1,000 leads

- The formula chain:
 - Goal revenue ÷ avg cash per sale = **sales needed**
 - Sales needed ÷ close rate = **completed calls needed**
 - Completed calls ÷ show rate = **bookings needed**
 - Bookings ÷ lead-to-booking rate = **total leads needed**
- Divide total leads by 30 to get your **daily lead target**
-
