Executive Summary

Brandon Carter runs through 8 things he personally spends money on without regret — from a hot girlfriend and a nice watch to AI subscriptions, testosterone therapy, a GLP-1 drug, and GoHighLevel CRM.

Contents

- 🧑‍🔥 #1: Super Hot Girlfriend
- ⌚ #2: At Least One Really Nice Watch
- 🤖 #3 & #4: Claude Pro Max and ChatGPT Pro
- 💉 #5: Testosterone Replacement Therapy
- 💍 #6: Oura Ring
- 💊 #7: Tirzepatide (GLP-1)
- 🏢 #8: GoHighLevel

#1: Super Hot Girlfriend [0:00](#)

- Brandon's take: a very attractive girlfriend is expensive but worth it
 - Specifically calls out Latina girlfriends as particularly costly to maintain
 - Expenses cited: waxing and laser treatments
 - Comedic warning: skip the upkeep and "you might wake up next to Chewbacca one morning"

#2: At Least One Really Nice Watch [0:08](#)

- A quality dress watch is necessary for formal occasions — weddings, events, court appearances
- His reasoning: wearing an Apple Watch with a suit makes you look like "a cyber bully"
 - The joke sets up his transition to the next item

#3 & #4: Claude Pro Max and ChatGPT Pro [0:23](#)

- He pays for **both** subscriptions and considers them non-negotiable
- Rationale: "if you're anything like me, then you're talking to AI more than you're talking to your family"
 - Implies heavy daily reliance on AI for work and decision-making

#5: Testosterone Replacement Therapy [0:33](#)

- Brandon started TRT as part of what he calls his "midlife crisis"
- His levels before TRT: within the normal range but at the **low end**
- His levels after TRT: still within the normal range but now at the **top of the normal range**
- His framing: optimizing within normal limits rather than going supraphysiological

#6: Oura Ring 0:45

- Previously used a Whoop band but switched to the Oura Ring
- Core reason for the switch: the Whoop has the same problem as the Apple Watch — looks out of place with a suit
 - "When I see somebody wearing a Whoop with a suit, I'm like, 'Yo bro, you about to go train after this?'"
- The **Oura Ring** "blends perfectly with all attire" — discreet enough to wear anywhere

#7: Tirzepatide (GLP-1) 0:57

- Refers to tirzepatide (brand name Trizepi/Zepbound/Mounjaro) as a GLP-1 receptor agonist
- His position: if you're trying to get lean and not using a GLP-1, "you're just making it harder on yourself for no reason"
- Personal experience: "When I cut with the tirzepatide, it's almost like too easy"

#8: GoHighLevel 1:08

- **GoHighLevel** is the CRM/marketing platform he uses to run all his businesses
- Use cases he lists:
 - Building all landing pages
 - Answering DMs automatically
 - Posting across all social platforms
 - Managing all leads
- His verdict: "If you're not using GoHighLevel with your business, you're leaving money on the table"
