

Steal my \$20 million funnel.

Channel: Brandon Carter · Published: Aug 01, 2026 · Watch: <https://www.youtube.com/shorts/9CBld2vkbV4> Source: full transcript

Executive Summary

Brandon Carter outlines a five-step funnel — multi-platform posting, free giveaways, lead-capture landing pages, thank-you page call booking, and indefinite human-plus-AI follow-up — that he credits with earning over \$20 million online.

Contents

- 📣 Step 1: Post Multiple Times a Day on Every Platform
- 📺 Step 2: Give Away Something Free in Every Post
- 📄 Step 3: Send Leads to a Landing Page
- 📅 Step 4: Book a Call on the Thank-You Page
- 🤖 Step 5: Follow Up with Every Lead Indefinitely

Step 1: Post Multiple Times a Day on Every Platform 0:00

- The foundation of the funnel is consistent, high-volume content across all major short-form platforms simultaneously
 - Platforms targeted: Instagram, TikTok, and YouTube Shorts
- Tool used: **Go High Level**
 - Upload one video once and it auto-distributes to all three platforms
 - Removes the need to manually post on each platform separately

Step 2: Give Away Something Free in Every Post 0:22

- Every piece of content includes a free offer to drive engagement and capture leads
 - Mechanic: viewers comment a keyword and the free resource is automatically DM'd to them
- Tool used: Go High Level (he prefers it over MiniChat to keep everything on one platform and avoid multiple subscription costs)
- What to give away matters — free tool or interactive asset outperforms a static document:
 - Old approach: ebooks or free guides (still work but are less effective)
 - **Better approach:** free tools, surveys, or questionnaires that are personalized to the individual
 - AI can be used to build these assets

- Go High Level has a built-in builder (described as similar to Lovable) that integrates the tool directly into their CRM, so leads are captured automatically

Step 3: Send Leads to a Landing Page 0:46

- If giving away an ebook or similar static asset, do NOT just DM the file — send them to a landing page first
 - Landing page collects: name, email, and phone number
 - That data flows into Go High Level and the person is added as a trackable lead available for follow-up
- This step converts a passive DM interaction into a named, contactable lead in the CRM

Step 4: Book a Call on the Thank-You Page 1:09

- After the lead submits their info, the thank-you page is prime real estate — do not waste it
 - Recommended elements on the thank-you page:
 - A video congratulating them on taking action
 - A direct link or widget to book a call (e.g., via Zoom)
- Rationale: many people will book right there in the moment — skipping this step leaves significant revenue on the table
- The high-ticket offer requires a sales call over Zoom to close properly, so getting the booking early is critical

"If y'all not doing that, you leaving tons of money on the table."

Step 5: Follow Up with Every Lead Indefinitely 1:31

- No lead should ever be abandoned — follow up continues indefinitely
 - Primary follow-up: Brandon and his team handle outreach personally
 - Safety net: AI steps in for any lead that slips through the cracks to ensure nobody goes uncontacted
- The combination of human outreach and AI follow-up ensures full coverage of the lead list
- The underlying reason: the product being sold is **high-ticket**, meaning every unconverted lead represents significant lost revenue
