

Can you eat dessert and still get shredded?

Channel: Brandon Carter · Published: Jul 16, 2026 · Watch: <https://www.youtube.com/shorts/q88Z-iT-QjY> Source: full transcript

Executive Summary

Eating dessert a few times a week won't derail your fitness goals — hitting your daily calories and macros is what actually matters. Brandon plugs a free AI tool called the Ripped Road Map to help you find your exact numbers.

Can You Eat Dessert and Still Get Shredded? 0:00

- **Yes — 100%**, eating dessert a few times a week is compatible with getting shredded
 - The only condition: you must be hitting your calories and macros every day
 - Candy, cake, and other desserts can fit into your diet as long as the numbers add up
- Brandon personally doesn't eat desserts, framing it as an adult preference rather than a strict rule
 - His point is that it's a choice, not a requirement for leanness
- The single deciding factor is knowing *exactly* what calorie and macro targets you need for your specific goal

The Ripped Road Map Tool 0:23

- Brandon promotes a free tool called the **Ripped Road Map** designed to calculate your personal targets
- How it works — input the following:
 - Your height
 - Your weight
 - Your goal
 - A photo of yourself
- An AI scans your photo and returns:
 - Your exact body fat percentage
 - How much total body fat you are currently carrying
 - The precise daily calories and macros you need to reach your goal
- Cost: completely free

- To receive it: comment the word **"road map"** on the video and Brandon will send it to you
