From a White Wall to a Miami Sunrise

Channel: Brandon Carter · Published: Nov 13, 2026 · Watch: https://www.youtube.com/shorts/ivmDhsl2qd8 Source: full transcript

📋 Executive Summary

In this short clip, Brandon Carter experiments with an interactive background effect that displays text, animates numbers, and ranks items on screen — demoed with AI tools Perplexity and Claude.

📑 Contents

- 🎨 Discovering the Background Effect
- 🤖 AI Tool Rankings Demo

🎨 Discovering the Background Effect 0:00

- Brandon notices (or is surprised by) text appearing behind him on his background
  - Asks rhetorically "Yo, who put these words behind me?"
- The effect can display dynamic text and animations
  - It can run visual effects on command
  - It can animate and count numbers when spoken — he demonstrates with **1.5 million**
  - It can display ranked lists of items

🤖 AI Tool Rankings Demo 0:00

- Brandon uses the background effect to rank AI tools he uses
  - **Perplexity** — rated D tier
  - **Claude** — rated S tier
- No further tools or tiers are mentioned in the clip
